

Practical indications for the prevention and management of SARS-CoV-2 in ambulatory dialysis patients: lessons from the first phase of the epidemics in Lombardy  
Giuseppe Rombola, Marco Hedemperger, Luciano Pedrini, Marco Farina, Filippo Aucella, Piergiorgio Messa, Giuliano Brunori

Questions prepared by Kristen Schuck

1. In the two involved dialysis units in Lombardy, how many patients were initially infected and isolated at each unit?
2. What are some of the circumstances of dialysis patients that may require special consideration in dealing with the disease?
3. At the time of writing, how many staff had been infected?
4. What were considered the three main goals for limiting the spread of Coronavirus in the dialysis ward?
5. Where were patients with fever and signs of airway infection sent prior to commencing dialysis?
6. In the wait for a curative treatment or an effective vaccine, what is the best means for minimising the impact of the epidemic?
7. Reflecting on your own experience, what changes have been made in your dialysis unit to keep patients and staff safe?
