

Effect of extended hours dialysis on markers of chronic kidney disease-mineral and bone disorder in the ACTIVE Dialysis study

Zhipeng Zhan, Brendan Smyth, Nigel D. Toussaint, Nicholas A. Gray, Li Zuo, Janak R. de Zoysa, Christopher T. Chan, Chenggang Jin, Anish Scaria, Carmel M. Hawley, Vlado Perkovic, Meg J. Jardine, and Ling Zhang

Questions prepared by Sreeni Sharma

1. What is the aim of this study?
2. Dialysis patients from how many countries participated in this study?
3. What were the biochemical markers chosen for the study?
4. How often were the participants assessed?
5. Which marker was mostly improved by extended hours of dialysis according to this study?
6. Which markers were mostly unchanged by extended hours of dialysis according to this study?
7. What effect did extended hours have on patient's diet?
